BOAT REPORT Chris-Graft 25 Corsair • cuddy-cabin sportsboat • built in the United Strelassic 1950s styling • single 315hp petrol engine • 43 knots • £79,216 as tested

decks The cockpit is the key area on what is a day boat at heart, and its layout is conventional, with twin

Volvo Penta supply the V8 petrol options. from the 280hp 5.7Gi, through the 315hp 5.7GXi installed in our test boat, up to the 420hp GXi. DuoProp legs are optional extras.

Diesel choices include the 240hp Yanmar 4HLA-ST2P and 315hp 6LPA-STZP, or you can stay with Volvo Penta by way of the 300hp KAD300, in this case with a DuoProp outdrive as standard.

Of course, purists will argue that a diesel does not belong in a craft of this type...

PERFORMANCE & HANDLING

You do not need to drive fast to make an impression in a boat like this, but the 25 Corsair still displays a fair turn of speed.

Full throttle sees the 315hp Volvo Penta spinning its twin props at 4800rpm, for a useful maximum of 43.5 knots. Anything faster than this requires an exponential application of power, hence the 8.1-litre engines at the top of the option list.

And on the rare occasions when the speed and style of your new toy still fail to catch the eye of everyone in the vicinity, you can always bank on the switchable straight-through exhausts doing the trick.

bucket seats forward and an L-shaped bench seat aft, with the option of a table.

One deviation from most modern sportsboats is the lack of a walk-through transom gate. Whether this is to stay true to the original design concept or to open up more options in the engineroom

It seems a shame on a boat of this type that there isn't more provision for sunbathing beyond the aft sundeck. An infill to convert the

bathing platform A neat design incorporates a shower, a tow ring and a fold-out ladder.

facilities Sink, fridge and coolbox are hidden within smart teak-topped mouldings and in an underfloor locker.

seating area into a sunpad would have been the obvious solution.

A moulded unit to port integrates both a sink, under a hinged lid, and a small locker. A bigger one to starboard houses the optional fridge, alongside another small locker. Topped by teak steps, both of these mouldings double as stairways down when boarding from alongside.

A large underfloor locker, set between the forward seats and opening on a gas strut, reveals a coolbox. The port section of the af bench also includes a large carpeted locker which could take skis, and a draining locker that houses the battery master switch.

The forward passenger seat has a glove compartment, incorporating

the stereo system, just below a well-placed grabhandle.

Access to the bow is through the centre opening section of the windscreen, assisted by a moulded step. The anchor locker is a good size and you can opt for an electric windlass with remote control.

foredeck The anchor locker is large, and the teak toerail is both stylish and practical.

Chris-Craft 25 Corsai

What do you mean, things ain't what they used to be? Here's a classy modern sports cuddy in period dress, from revered boatbuilders who have gone back to their roots. REPORT BY JOHN WOOD portable toilet. However, a simple vee-berth

an involuntary smile will spread Chris-Craft were to American sportscruisers what Aston Martin were to cars.

Now, after a couple of decades spent languishing in the hotly contested mass market, this once proud marque has gone back to its roots in a brave bid to restore the

Their new range of retro-styled craft covers everything from a 22ft open-cockpit launch to a 43ft cruiser, but to our eyes the 25ft Corsair sports cuddy is the most relevant and appealing to UK boaters. It looks sensational

ention the name Chris-Craft to any for starters, dressed up in copious quantitie motorboater over the age of 50 and of traditional teak and chrome. A flared bo tapered stern and minimalistic windscreet across their lips. Back in the 1960s, complete the image of a boat that wouldn't look out of place on the set of a Marilyn Monroe film.

But what's this? Almost £80,000 for a 2 mean forgoing the wood and glitter Herita in windy conditions, and vulnerable to styling pack, not to mention the beefier engine options. And frankly it would be had a stray warp. the boat without them.

to be something special to justify that pricesterndrive engine installations is available. And, as you'll discover, it is.

DESIGN & LAYOUT

Despite its drop-dead looks, the layout of the 25 Corsair is actually fairly conventional.

The cuddy cabin sits forward under the flat foredeck and, judging from its limited dimensions, is intended primarily for use as dry storage and comfort breaks on the arrangement means occasional overnighting s perfectly possible.

The cockpit has swivelling bucket seats forward and a wraparound bench aft with a neatly integrated bar.

Good quality GRP mouldings blend suprisingly well with the period teak and stainless steel fittings to create a convincingly classical ambience. For us, the dayboat? We're afraid so. You can buy a ba only element that doesn't quite work are the Corsair for just over £50,000, but that woll deck-mounted horns. They are prone to spray

POWER OPTIONS

Even so, a fully kitted-up 25 Corsair net A wide choice of both petrol and diesel single

cabin The vee berths are wide but headroom is limited.

Access to the cuddy is through a double-hinge teak-slatted door and down one step.

Even though the flare of the bow allows a generous amount of under-deck space, the flat foredeck limits headroom inside.

Chris-Craft have kept it really simple down here, providing just vee-berths with an infill, and a recess for a portable toilet underneath

Fittings are minimal, limited to a mirror in the bow and spot lights, but the first rate finish of the mouldings still succeed in giving the cuddy a surprisingly spacious feel.

Whether they will attract looks of envy or disapproval is another matter.

Setting the throttle at 4000rpm churns out a fast cruising speed of 35.4 knots, while 3000rpm gives a more relaxed 25.2 knots. Pick up from tickover is swift, punching the boat over the hump and onto the plane in short order. Good mid-range torque means you power through turns with minimal drop-off in pace and pull away smoothly.

Calm water meant we had only our own wash in which to test the ride, but Chris-Craft hulls have always proved seaworthy.

It certainly handles more like a relaxed gentleman's cruiser than a sensitive sportsboat, reacting faithfully to helm inputs without feeling jitterish. The DuoProp leg means that left-hand turns have a slightly larger turning circle, but cornering remains predictable and positive in either direction.

The helm and co-pilot's seats each have a lift-up bolster for a lean-back driving position. Whether you use this or remain seated, your comfort is guaranteed thanks to a wide range of seat and wheel adjustment.

Although the shallow screen does not wrap round the cockpit, protection from spray is sufficient for most conditions.

engineroom

Twin electric rams, almost mandatory on a boat like this, gently lift the whole of the aft sunpad to reveal a very tidy engine installation.

Daily service checks are easy, as access to the key items has been carefully planned. The bay has a moulded lining, and wiring and piping runs are neatly

underside of the hatch is carefully insulated, but this dampens rather less noise than the straightthrough exhaust facility makes!

executed. The

helm Modern function is expertly combined with a classic feel. Instruments and switches are set on a stainless steel background, and the gauges have a retro look, with fine graduations on a black background. Switches are set below, on another panel, flanking the steering wheel.

conclusions

A contemporary layout has been squeezed into a classic-looking boat, partly by using modern dimensions and partly by adding retro features. Though there is a cuddy, this is really a dayboat.

£79,216 as tested

At these prices, you expect a very well built craft, an that is what you get. The quality shows through in the attention to detail and price of the options, which are not for the faint-hearted.

Even with a mid-range petrol engine option, the bos has plenty of pace to match its grace. Pick-up is swift and handling surefooted.

MBM's verdict

The Chris-Craft 25 Corsair is neither the most spacious nor the most exhilarating sportsboat available. If that's what you want, look elsewhere. But if you are seeking something more special, something that captures the style and elegance of yesteryear with the convenience expected of a modern craft, this boat delivers by the bucket load It is a vessel for someone with money and style, just like Chris-Crafts always used to be.
